

Alejandro Marcano Van Grieken

Data Engineer / Data Analyst / Product Owner / AI Developer / Instructor

Madrid, Spain | +34 632 52 43 05

dataconale@gmail.com | site: www.alemarcano.framer.website

PROFILE

Data professional with a strong background in data engineering, AI, and automation, with experience across startups, consultancies, and freelance work, specializing in translating business requirements into scalable data products. Experienced Product Owner managing projects from MVP to production-ready AI solutions. Passionate about teaching, sharing knowledge through training, articles, and tech events.

EDUCATION

Universidad Metropolitana, Caracas

Sep 2015 – Dec 2019

Software Engineering

- GPA: 17.28/20 — 100% scholarship for academic merit
- Thesis: “Facial Recognition Using Convolutional Neural Networks”, Honorable Mention
- Ranked first position in the Systems Engineering graduating class

WORK EXPERIENCE

Aditelsa — Client: Indra Minsait, Madrid

May 2025 – Present

Data Engineer

- Designed and implemented end-to-end ETL processes in Microsoft Fabric, migrating legacy architecture into a modern cloud ecosystem
- Built a Data Warehouse architecture models to centralize ingestion and transformation layers, ensuring scalability and governance
- Worked with JIRA and Confluence to structure epics, tasks, and subtasks, improving project clarity and delivery

Procesia Consulting — Client: INE (remote)

Dec 2023 – Mar 2025

Data Product Owner

- Reduced manual Excel workflows by 90%, cutting report delivery times from days to hours
- Directed the migration of legacy processes (90% Excel-based) to modern stacks (Python, SQL, Airflow)
- Led requirement gathering with clients and stakeholders, translating business needs into data-driven solutions using JIRA and Confluence

Crowdfarming (hybrid in Madrid)

Jul 2022 – Dec 2023

Product Data Analyst / Engineer

- Built an AI-powered clustering solution for user complaints using Generative AI (LLMs, OpenAI API, n8n workflows)
- Improved data consistency from 60% to 98% by developing a data quality program reconciling MongoDB and PostgreSQL sources
- Delivered database reporting in PostgreSQL with Tableau and Streamlit

InnovativeGX (remote)

Jul 2020 – Jul 2022

Python and SQL Developer

- Led full-cycle development of data-driven applications as both PM and Developer using Django, Flask, Linux Servers.
- Automated JasperServer reports, cutting patient delivery time by 90% and manual work by 80%
- Integrated Snowflake for cross-referencing genetic datasets, reducing query time by 40%

Universidad Metropolitana and CultureLab (freelance, remote)

Sep 2020 – Jul 2021

Instructor

- Conducted Fundae-sponsored corporate training in Python for Data Analysis, Advanced Python, and BigQuery
- Taught university courses in Mathematics I, Algorithms & Programming, and Database Administration

Vikua (hybrid in Venezuela)

Jun 2018 – Jul 2020

Data Scientist and Product Owner

- Built a Data Warehouse in BigQuery using Cloud Functions and Looker Studio for GCP data visualization
- Developed predictive models (regression and classification) with scikit-learn and Keras on public transport data
- Applied Agile/SCRUM methodologies and created a chatbot using Google Dialogflow

SKILLS

Programming Languages: Python, JavaScript, Dart, R, Java, C

Data Engineering: Microsoft Fabric, PySpark, Airflow, DBT, Docker, PySpark, Kafka, Snowflake, BigQuery, OracleDB, Git

AI / Data Science: TensorFlow, PyTorch, Keras, scikit-learn, OpenAI, LangChain, Embeddings, pandas, NumPy, Jupyter

BI & Analytics: Power BI, Looker Studio, Tableau, QlikSense, JasperReports, Google Analytics

Databases & Cloud: MongoDB, PostgreSQL, MySQL, OracleDB, Firebase, SQL Server, GCP, AWS

Backend & No-Code: Django, Flask, Node.js, Notion, Airtable, Framer, Glide, n8n, FlutterFlow

AWARDS

2nd Place, JOBarcelona Hackathon

Jun 2022

Camp Nou, JOBarcelona, NUWE

- One-day hackathon using Python, TensorFlow, scikit-learn, pandas, Streamlit, and Graphext
